

Power Clean P50 Max

Cordless Pressure Washer

The Aguri Power Clean P50 Max cordless pressure washer takes portable cleaning to the next level with up to twice the power of most other cordless pressure washers. With an enhanced pressure output of 55 Bar (800 PSI), the P50 Max delivers even greater cleaning power, all while remaining battery-powered, compact, and lightweight.

This super portable jet washer provides up to 20 times the pressure of a standard hose and can be assembled in seconds. It features a powerful 4.0Ah Li-ion rechargeable battery for extended run times, and its all-new spray head offers versatile settings—from zero to 40 degrees and a shower option.

With three power settings (low, medium, and high), you can adapt the pressure to suit any task. Connect to a household tap or draw from any water source, like a bucket, stream, or pond—just click the battery into place, and you're ready to clean anywhere, anytime!
