Data:

- Approved to:** BSEN 795
- Material:** Various & Large opening Steel Hanger
- Fittings:** As above
- Weight:** 271g
- Features:** Removable and replaceable expanding element

Description:

In the normal scope of works, fall arrest eyebolts are tested to BSEN795, and then fitted in accordance with BS7883. Within various industries in the UK, a need was identified for a temporary and removable eyebolt to be used in conjunction with portable ladders and restraint on flat roofs. The Tetra 20mm temporary anchor bolt has been tested to ensure the BS8437 standard is being met. Following testing it was confirmed that the anchor bolt is capable of protection in excess of this figure and has been recognised by the HSE installed into a suitable substrate for usage in accordance with the short duration roofing standard contained within HSG33. This bolt should Only be used with Tetra Flat Roof System or as a ladder tie bolt for Tetra ladder systems
